

*EFOY Pro Fuel Cell
Highest Public Security due to Flexibility in CCTV Installations*

*Power Anywhere and Anytime
for Stationary Audio and Video Surveillance Systems*

- 🔋 *Long Autonomous Power Supply*
- 🔋 *Easily installed – theft and vandalism proof*
- 🔋 *Non-Detectable Power Supply*

Ensure Public Safety by Reliable Power Supply

The Application:

Stationary audio and video surveillance systems are used for physical protection and observation, border protection, public safety, event security, nature observation and can also be installed covert for undercover surveillance.

Power demand: Between 25 and 50 W

The Challenge:

Semi-stationary and stationary surveillance systems often do not have access to the mains grid, limiting the possibility to install CCTV at remote areas.

The Solution:

EFOY Pro fuel cells provide reliable power for weeks on end, without need for maintenance.

The Benefits:

- **Long autonomy** – The EFOY Pro fuel cell can produce power 24/7 in any weather, climate or season. As long as fuel supply is assured, the EFOY Pro supplies power. Autonomy of the CCTV system can be lengthened according to the size of the fuel cartridge employed.
- **Easily installed – theft and vandalism proof** – The EFOY Pro fuel cell is lightweight, compact and can easily be installed into existing cabinets and outdoor boxes. Installed into a suitable enclosure, the EFOY Pro fuel cell is not exposed to theft or vandalism
- **Non-detectable** – The EFOY Pro fuel cell is suitable for silent-watch operations. It is easily camouflaged by integrating the fuel cell into surroundings that do not attract attention. A running, integrated fuel cell cannot be recognized from the outside. No vibrations, noise, exhaust or heat is detectable.
- **Emission-free** – The EFOY Pro fuel cell only has minimal impact on the environment. Only small amounts of water vapor and CO₂ are emitted, allowing its use in nature reserve areas.

➔ *The EFOY Pro fuel cell ensures reliable power supply of all kinds of surveillance systems*

Several state and federal law enforcement organizations as well as security companies throughout the world are already using the EFOY Pro fuel cell as power supply for border control, physical protection, event security, undercover surveillance and nature observation
